Austin Johnson
Full Stack Web Developer | Software Engineer

Palm Springs, CA | 714-655-9220 | austintjohnson92@gmail.com | GitHub | LinkedIn

TECHNICAL SKILLS

Front End: React.js, Vue.js, JavaScript, TypeScript, Redux, Apollo GraphQL, Context API, REST API, Jest, Cypress, Axios, HTML5, CSS3, SCSS, Tailwind

Back End: Node.js, Express, SQL, MySQL, Digital Ocean

Additional: Git, Vite, Figma, Asana, Jira, Photoshop, Illustrator, After Effects, Premiere Pro

PROJECTS

Command Center, *Full Stack Developer* - React | Redux | GraphQL | Tailwind | Node | SQL | Website **2022 - Present**
- Spearheaded the project by being the first to translate design concepts from Figma into code, taking the lead in building the application.
- Collaborated closely with the backend architect to seamlessly integrate GraphQL queries, mutations, and subscriptions into the front end, successfully implementing a functional email inbox.
- Contributed to the backend Node repository: facilitated contact creation working with Nylas and Vonage APIs for efficient contact merging.
- Partnered with QA to conduct testing, identify bugs, and generate corresponding Asana tickets

Heads Up Hair Designs, *Full Stack Developer* - Figma | React | Node | Express | SCSS | GitHub | Website **2023**
- Developed a series of mock-up designs using Figma, providing the client with comprehensive visualizations
- Utilized React to expertly construct a polished website to showcase the company's work and help connect with clients
- Implemented a Node backend to route email queries to an external mail server
- Developed a clean, modern, and interactive UI using SCSS; Deployed the app using Digital Ocean

HRF Asylum, *Project Manager, UX / UI / Front End Developer* - React | JavaScript | Figma | HTML | CSS | GitHub | Website **2022**
- Created both desktop and mobile mock-ups for a landing page for the Office Status Tracker using Figma
- Met with stakeholders to present progress and coordinated architecture optimization tasks based on feedback
- Implemented Figma design using HTML and Less.js CSS preprocessor to build a landing page
- Utilized JavaScript to build a feature that provides users with download capabilities for data chart visualizations
- Led stand-up meetings with a product team of 8 developers to map out weekly goals in Jira

Adhype Visuals, *Full Stack Developer* - Vue | Node | Express | SCSS | GitHub | Website **2022**
- Produced a professional website using Vue to highlight the company's projects and facilitate connections with clients.
- Configured Vue router link to navigate pages of the website
- Created a Node backend utilizing Express to route email queries to an external mail server
- Developed a clean, modern, and interactive UI using SCSS; Deployed the app using Digital Ocean

Crypto Sniper, *Front End Developer* - React | REST API | GitHub | Website **2022**
- Created a React application to show current cryptocurrency prices by market cap
- Implemented several APIs to show the most current and up-to-date prices
- Built a sleek and professional-looking UI using common react component libraries
- Launched the application using Vercel

EXPERIENCE

Thryv, *Web Developer* - React, Redux, Context API, Axios, Node, GraphQL, Tailwind, Vite, SQL | [Website](#)   **2022 - Present**
- Initiated the development of a brand new project, being among the first contributors from its inception.
- Played a crucial role in virtually every facet of the application's development, showcasing versatility and a comprehensive understanding of the project's intricacies.
- Demonstrated effective contributions to both the frontend and backend codebases
- Embarked on the learning path of a new coding language, VTL (Velocity Template Language), as part of my ongoing professional development and to help contribute to the backend GraphQL side of the application's codebase

Adhype Visuals, *VJ / Content Creator* - Adobe After Effects: Illustrator, Photoshop, Resolume | [Website](#)   **2020 - 2022**
- Started a small business working with clients to design and create concert visuals from concept to completion
- Provide visual content for the concerts of various artists and corporate business events

Professional Production Specialists, *Technical Director*   **2017 - 2020**
- Facilitated day-to-day operations: connected with clients, created invoices, managed projects
- Designed brand-specific content for individual clientele
- Led on-site video engineering team to ensure proper production design installations
- Managed warehouse team of 10+ members to fulfill equipment QC and prep for upcoming events

MixOne Sound, *Video Engineer*   **2011 - 2017**
- On-site lead video engineer for all events and received outstanding production feedback year after year
- Worked with artists' video teams to ensure proper setup of equipment and software

EDUCATION

BloomTech (Lambda School), *Graduate, Full-Time Program, Full Stack Web Development*   **2022 - 2022**
Roe Visual Certified Technician   **2019**
